ONE PAGE STRATEGIC PLANNING & COACHING

Go From Good to Great – Coaching & Rhythm Programmes

Coaching and Rhythm Programmes originated from America. These programmes have a proven track record of helping growth companies go from Good to Great. Many of our clients are Inc 500, Best Place to Work Winners and Fast Growth Entrepreneurs.

Have the Right Winning Moves

Coaching and Rhythm Programmes help performance-oriented CEOs and their senior management teams keep focused, aligned and clear on the right goals. How? By helping them on choosing and executing the right winning moves based on the Four Key Decisions: People, Strategy, Execution and Cash. In Singapore, Charles & Keith and DP Architects are pioneers in adopting these programmes.

Get Started: Strategic Planning 1 Day Workshop

Work with a Certified Coach to develop your One Page Strategic Plan and learn the Four Decisions (People, Strategy, Execution and Cash) that all growth companies must get right.

Improve your company and team by drilling in and making 1 or 2 high impact decisions. These head domino decisions will help you to:

- Grow the leadership capabilities of your team (People Decisions)
- Grow your revenues with the right winning moves (Strategy Decisions)
- Build the right habits and process to improve profitability and save time (Execution Decisions)

Next, continue to work with your Coach every quarter to help you clearly define your company and individual priorities, develop success metrics, and determine a quarterly theme.

Execute Well: Creating Dashboard with Rhythm Software

By working every single day purposefully, you would realize your quarterly plan. By realizing your quarterly plans, you would realize your annual plan. But plans are worthless if they are not executed well.

Our clients are successful companies with more than 40 employees. Along with success came some challenges. They grew to the point where they had difficulty managing the volume of activities across employees and departments that must get done to achieve their goals every quarter.

The Rhythm Execution Program provides you with an online system providing dashboard to help you and your employees to focus and win every single week.

Facilitator:

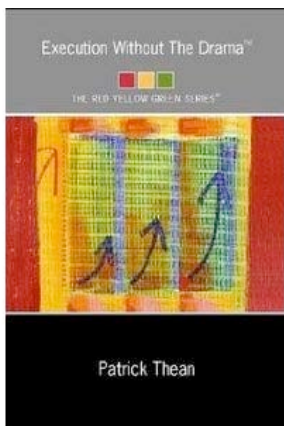

Patrick Thean is an award winning serial entrepreneur who has started and exited multiple startups. He received the Ernst & Young Entrepreneur of the Year Award for North Carolina in 1996 and achieved a ranking of 151 on the Inc 500 in 1997.

An international speaker and the author of *Execute Without Drama*, Patrick has spoken to thousands of business owners on the topics of sustaining business growth, venture capital, and strategic exit strategies. He provides practical insights on building a culture of execution. He has spoken at Fortune Growth Conferences and various Entrepreneur Organization chapters. Patrick is currently Co-Chair of the world renowned EO Entrepreneur Masters Program in partnership with MIT (Massachusetts Institute of Technology). Patrick has earned the reputation of being a top coach for high growth companies.

Patrick speaks and facilitates seminars on: 1) Mastering The Rockefeller Habits (Business Growth); and 2) SuperGreen™ Execution – How to align your team, deploy your resources with 100% confidence and avoid being blindsided. Patrick earned Bachelors and Masters degrees in Electrical Engineering from Cornell University.

Books by Patrick Thean

Execute Without Drama™

The power of metrics is astounding! Actually, its the RIGHT metrics that carry all the power. What can you measure NOW that will give you insight into the FUTURE of your business? Measuring the right things right now can help you to predict outcomes. Predicting outcomes allows you to solve problems today instead of being blindsided by them tomorrow. I was running an Inc 500 company during the mid 1990's. Growing in excess of 100% a year, with my "hair on fire", we measured various metrics including the usual financial Key Performance Indicators (KPIs). But wait! These KPIs were about past and current performance. They allowed you to celebrate with ice-cream parties, but did not provide insight regarding future problems and outcomes. It wasn't until I discovered the RIGHT THINGS to measure that we began sharing bonuses along with the ice-cream. This is my story, my journey of discovering the right things to measure and the dashboards that changed my future.
